SOFTWARE ENGINEER

☎ (+82) 10-3088-3980 | ✉ syjn99@gmail.com | 🏠 junsong.xyz | 📱 syjn99 | 🌐 youngthejun

Summary

Software engineer with a deep interest in the **Ethereum Consensus Layer (CL)** and P2P networking, proficient at prototyping. Quickly grasps new technologies and rapidly implements what we need while evaluating critical design tradeoffs. Skilled in writing Go, Rust, and Python and producing clear technical documentation. Prefers to explore feasibility and proof-of-concepts (PoC) through code implementation.

Work Experience

Offchain

BACKEND ENGINEER, PRYSM

[Remote](#)

June. 2026 - Present

- Engaging in **Ethereum core development**, especially in consensus layer.

Ethereum Protocol Fellowship

FELLOW

[Remote](#)

June. 2025 - Nov. 2025

- Designed and implemented **SSZ Query Language** in **Prism** from scratch. (Final report: [epf.junsong.xyz](#))

ReamLabs

LEADING CONTRIBUTOR

[Remote](#)

Dec. 2024 - Jan. 2026

- Maintaining **“Ream”**, the Lean Consensus Client written in Rust.
- Led the initial development of the client for the Post-Quantum (PQ) devnet, specifically focusing on client architecture design.
- Added modularity for choosing the backend of BLS signature primitive.
- Built a Proof-of-Concept project for integrating the Ethereum consensus state transition functions with zkVMs.

Superblock

PROTOCOL ENGINEER

[Seoul, S.Korea](#)

Apr. 2024 - Feb. 2025

- Maintained **“Chronos”**, the blockchain consensus client forked from Ethereum (Prism).
- Built CI/CD pipelines on Github Actions for binary deployment.
- Reduced the CI/CD pipeline runtime from 25 minutes to under 10 by leveraging Bazel Remote Cache Server and GCP Workload Identity Federation.
- Deployed tools to monitor and test the blockchain network.

FRONTEND DEVELOPER

Jan. 2023 - Mar. 2024

- Developed a GUI-based desktop application (**“OverScape”**) for operating a blockchain validator from scratch using Electron and React.
- Migrated the landing page from an SPA to Next.js, improving performance and SEO.

Open Source Experience

Ethereum Core Clients

PRYSM, RETH, LIGHTHOUSE

Aug. 2024 - Present

- Resolved the P2P sequence number persistence issue in [Prism](#). ([Related write-up](#))
- Fixed a bug that led to a memory leak when a future Ethereum upgrade (Pectra) was fully applied in [Prism](#).
- Added a new API for accessing fields (added in Electra upgrade) in the Ethereum Beacon State in [Lighthouse](#).
- Added a panel that tracks buffered outgoing messages in the mempool, for the [Reth](#) Grafana dashboard.

Education

KAIST(Korea Advanced Institute of Science and Technology)

B.S. IN SCHOOL OF COMPUTING

[Daejeon, S.Korea](#)

Mar. 2018 - Expected Feb. 2027

- GPA: 3.72/4.3** (Earned 129 Credits until Summer 2026)
- NYU Dual Minor Program in Cybersecurity.**

Extracurricular Activity

Orakle (KAIST Blockchain Society)

CORE MEMBER & VICE PRESIDENT AT 2023

[Seoul/Daejeon, S.Korea](#)

Sep. 2022 - Feb. 2024

- Delivered a presentation on **Ethereum Client Diversity** as a member of Team Client Diversity.
- Built the official Orakle website ([orakle-kaist.xyz](#)).
